Daniel Prinz

- agile web developer -

Profile

Hello, my name is Daniel and I live in Vienna. I like to develop and design software from the beginning to the final result. The previous years my focus was primarily on web applications with backend in Java. For me it is important to create working software in an agile way, so the user receives good quality software and gets features frequently.

General skills

- Agile Development
- Functional programming
- Object oriented programming
- RESTful web services
- Test driven development

Coding languages

- Java 8, Java EE 7
- HTML, JavaScript, SaSS (CSS)
